

Job Description

Loppet Foundation Mechanic

The Loppet Foundation is seeking a **seasonal mechanic** for the months of December and January. The mechanic will be responsible for maintaining winter grooming, snow removal, snow making and park maintenance equipment.

Duties:

- Regular equipment inspections
- Routine maintenance
- Repairs

Primary Equipment to be Maintained:

- Fleet of utility and grooming snowmobiles
- 2 Kubota RTVs with camoplast tracks
- Various small engine equipment like snow blowers and chainsaws
- Limited work on snow cats and snow guns.
- Tow behind Yellowstone and Tidd Tech grooming equipment

Qualifications:

- Previous experience as a mechanic on similar equipment as listed above
- Strong troubleshooting skills
- Knowledge of electrical actuators and how to repair and set up wiring systems for grooming equipment - and/or strong electrical wiring skills/understanding

This job should be complete in 20-40 hours/week but we realize it can vary depending on equipment breakdowns.

Mechanic will work primarily in Theodore Wirth Park maintenance building where the snowmaking and grooming teams are based. The mechanic must be able and willing to do some repairs outdoors in the cold weather.

The mechanic will take direction from the Trails Superintendent and Assistant Superintendent.

The mechanic will not be expected to have their own tools but if they prefer, they may use their own.

Wage: \$18-\$21/hour depending on experience
